

# Diagnify – Premium Lab ERP

## Lab patient feedback and satisfaction dashboard

This slide presents a patient feedback dashboard to be used by medical practitioners and staff members in order to improve the service given to patients. The key performance indicators are lab patient satisfaction rate, lab test turnaround, failed treatments etc.

This graph/chart is linked to excel, and changes automatically based on data. Just left click on it and select "edit data".

METHOD: CALCULATED  
**SGPT**  
METHOD: IFCC

LIVER FUNCTION TEST (LFT)				
TEST DESCRIPTION	RESULT	FLAG	REF. RANGE	UNIT
BILIRUBIN TOTAL	1		0.1 - 1.2	mg/dL
METHOD: JENDRASSIK & GROF'S				
BILIRUBIN DIRECT	0.20	H	0.0 - 0.4	mg/dL
METHOD: JENDRASSIK & GROF'S			0.1 - 1.0	mg/dL
BILIRUBIN INDIRECT	63	H	7 - 55	IU/L
METHOD: IFCC				
ALBUMIN	36		8 - 48	IU/L
ALBUMIN	0.57		0 - 46	RATIO
ALBUMIN	39		35 - 140	U/L
ALBUMIN	46		0 - 55	U/L
ALBUMIN	7		6.2 - 8.0	gm/dL
ALBUMIN	2.00	L	2.3 - 3.5	gm/dL
ALBUMIN	5		3.5 - 5.5	gm/dL
A : G RATIO	2.50	H	1.0 - 1.2	RATIO

Interpretation:

Test	Interpretation
Total protein	Total protein measures the total amount of protein in the blood, including albumin and globulin. Abnormal results may indicate liver or kidney disease, malnutrition, or inflammation.
Albumin	Albumin is a protein produced by the liver. Abnormal results may indicate liver or kidney disease, malnutrition, or inflammation.
Bilirubin	Bilirubin is a substance produced by the breakdown of red blood cells. Abnormal results may indicate liver disease or other conditions affecting the liver or gallbladder.
Alkaline phosphatase (ALP)	ALP is an enzyme produced by the liver and other organs. Abnormal results may indicate liver or bone disease, or certain medications.
Alanine transaminase (ALT)/ SGPT	ALT is an enzyme primarily produced by the liver. Abnormal results may indicate liver damage or disease.
Aspartate transaminase (AST)/ SGOT	AST is an enzyme produced by the liver and other organs. Abnormal results may indicate liver damage or disease.
